Mission Rubber Company

VENT CAP™

The **Mission Vent Cap™** allows you to bleed excess air out of the DWV system without having to remove the end cap.

Features & Benefits

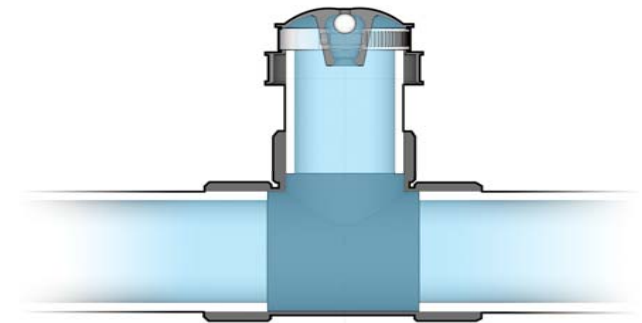

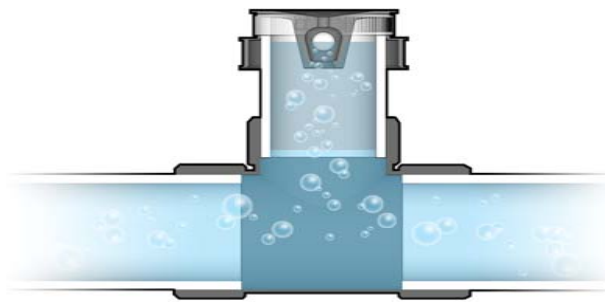

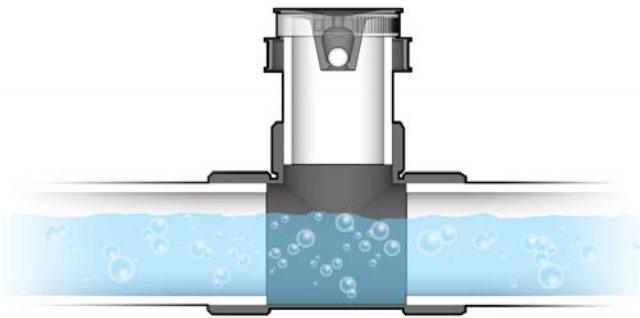

- No more trapped air in soil pipe inspections.
- No more failed inspections because system burps & stand pipe drops overnight.
- One man soil top-out instead of 2 or 3 (Labor saver).
- No more waiting for inspections because of possible trapped air in ground work.
- No more Niagara® caps blowing off.
- No more Niagara® caps with nails littering the job site as puncture hazards.
- No more gluing in a pipe just for cap and needing a coupling later.
- Great for mid-floor tenant improvements. Prevents vent overflows which cause property damage.
- Great for top-out inspections with multi-level roofs.
- The only test cap that fits over a fitting or pipe!
