

## Product Information

### Rubber to Metal Bonding

Mission Rubber Company specializes in rubber to metal bonding. We provide custom solutions by chemically vulcanizing various elastomers to a variety of substrate materials. Mission Rubber's proprietary bonding systems provide strong elastomer to substrate adhesion that is typically stronger than the elastomer itself. Mission Rubber uses injection molding, transfer molding and compression molding for rubber to metal bonding applications depending on the size, quantity and complexity.

Typical Product Applications:

- Fasteners
- Mounts
- Pads
- Bushings
- Couplings

Physical and mechanical property requirements to be defined according to customer specifications and requirements.
